

## Images for updated height of Splash Wall Sept 2019

The proposed height has increased from 50 cm to 66 cm.  $16\text{ cm} = 6\text{ and }1/3\text{ inches}$ .

That is more than  $2/3$  of the height of an adult's head.

The effects may be greater than shown as the current wall height varies. If it is intended to have the wall measured from the Esplanade pavement to a set height then some places will show more than a 66 cm increase.
